AWARDS

Awarded First Rank for securing the highest aggregate marks in MSc Computer Science at KANNUR University, 2024.

PROFILE

I am a Computer Science postgraduate with a strong passion for software development, eager to apply the skills I have acquired in a professional setting. My proficiency includes programming languages such as C, C++, and Python, complemented by a solid understanding of algorithms and data structures gained through coursework and hands-on projects. I am currently seeking an entry-level position in software development to contribute innovative ideas, while remaining committed to continuous learning and growth in the field.

ACADEMIC PROJECT

COMPLETE WEDDING PLANNER

This website provide grooms and brides an excellent matchmaking involvement exploring the favorable circumstances and resources to meet their true potential partners and support couples and their families with the organization and management involved with planning a successful wedding. This project involves ASP.NET as the front-end and SQL SERVER as back-end.

Enhanced QRCode Secret Embedding System

This Web Interface uses LSB (Least Significant Bit) steganography that is a technique used to hide secret messages within digital images, including QR codes.Using LSB steganography, the least significant bit of each pixel in the QRCode is modified to encode a portion of the secret message.While scanning only the cover message is extracted ensuring security of secret message.The project involve the use of HTML,CSS for the front-end and Python for the back-end.
